

HS-BEX

The HS-BEX has been designed and manufactured for detecting BETA radiation in hands and feet.

It includes 6 plastic scintillation detectors and one "frisker" for manual monitoring of different parts of the human body.

In case ALPHA radiation is also desired to be measured, the equipment can be customized for that purpose. The equipment version is the HS-BEXA.

SPECIFICATION

- 6 plastic scintillation detectors (4 for hands and 2 for feet)
- Temperature: 0°C - 50°C
- Software 100% customizable
- Lead shielding of 20 mm
- Humidity max: 90% noncond
