RADIOPHARMACEUTICAL PACKAGING

➔ Type A packaging

➔ Lead shipping containers

MOVEABLE BENDED PROTECTIVE SCREEN

- ➔ Movable screen made for work on the patients bed due the bended part
- ➔ Optimal shielding with 35 mm lead
- ➔ Easy handling because of the 4 swivel wheels

Specifically designed for use in combination with a patient bed. The screen is made of 35 mm lead covered with steel plates finished oyster white [RAL 1013]. The bended upper part has specifically been designed to enable a better reach towards the patient while protecting the main part of the technologists' body. Outside dimensions are 1220*1020*888 mm [H*W*D] and the weight is ± 268 kg. The bended part dimensions are 240*360 mm [H*W].

Model VG-FW-12/10/35
