TUNGSTEN SYRINGE SHIELDS - TWIST LOCK

- ➔ A sturdy syringe shield made of 2 mm tungsten
- ➔ Made custom for a specific syringe
- ➔ With a clear view at the syringe by the lead glass
- ➔ Fast fixing of the syringe by the twist lock

For low energy gamma applications the syringe shield is made of 2 mm tungsten. A clear view at the syringe volume is realized by the large lead glass window and the light colored internal coating. The twist lock models ensure an easy and fast fixation of the syringe. When ordering the twist lock model, please state the syringe details including the reference number and connector.
