

# Alpha and beta max hot cell

FULL RADIATION PROTECTION WARRANTY

## Key points

- ▶ Especially designed to manipulate molecular radiotherapy radioisotopes
- ▶ Protection is ensured through the use of acrylic resin screens on all sides, top and bottom, measuring 10 mm thick
- ▶ Additional lead shielding to stop bremsstrahlung radiation

## What makes the difference

- Possible options: cable gland/ compressed air
- Adjustable feet for better positioning
- 1 pressure gauge and integrated filtration unit
- Option shield front screen: 6 mm of lead

ADDITIONAL PRODUCTS

Syringe shield for beta radiation

W 42

easyBOX®

W 39

Beta protection screen

W 43

## Characteristics

**Internal dimensions:**

L. 800 x H. 680 x W. 600 mm

**Overall dimensions:**

L. 1200 x H. 1850 x W. 650 mm

**Side door**

1 18-watt fluorescent light tube

1 15-watt germicidal UV tube
