

Description

Disk sources are designed for use as reference sources. Each disk source is constructed using Plexiglas and is available in two sizes:

- 0.125 x 1.0 inches (3.2 x 25.4 mm)
- 0.125 x 2.0 inches (3.2 x 50.8 mm)

The maximum deviation of the delivered activity from the nominal values listed is $\pm 20\%$. A secondary calibration (against a NIST Traceable source) is available for an additional cost. This will provide a calibrated activity with a maximum deviation of $\pm 5\%$ from the labeled activity. Beta sources are not available for calibration.

Activities will not exceed the U.S. NRC Exempt Quantity limit.
