

CRC QUICKY III

RP equipment designed for vertical measurement with detection and internal radioactive differentiation capacity. The CRC QUICKY III has been designed for performing high speed analysis making it ideal for performing a large volume of personnel measurements in a short time. Due to its complete analysis software, it is able to identifying and quantifying radioisotopes in a wide energy range.

SPECIFICATION

- 4 NaI detectors
- Efficiencies: >30% (Co-60), >15% (Cs-137), >6% (Ba-133)
- Lead shielding of 50 mm
- Humidity max: 90% noncond
- 20 plastic scintillation detectors
- Analysis time: < 1 min
- Temperature: 0°C - 50°C
- Software 100% customizable
