

MOS 6

The MOS 6 is a motorized system of gamma radiation detection and measurement. It has been designed and manufactured to handle objects of big size (up to 1000 kg). It includes 8 wide-area plastic scintillation detectors.

SPECIFICATION

- 8 plastic scintillation detectors
- Efficiencies: >30% (Co-60), >15% (Cs-137), >6% (Ba-133)
- Lead shielding of 20 mm
- Temperature: 0°C - 50°C
- Humidity máx: 90% noncond
- Software 100% customizable
